Horizons from peaks	11 pcs.
Terrain profiles	25 pcs.
Photos	175 pcs.

Why we publish the Guide

There are great possibilities to use free time. It is important that in this you experience something nice and exciting. You can be at the sea-side, under the palm-trees, in the boat, on water and under water, or in the air, but active stay on the mountain will give you something more. Even if you live in this city permanently or temporarily, perhaps you did not have the opportunity to become familiar with its environment. If you are a foreigner, staying here for short or long time, at the border of West and East and you had the opportunity to experience all the diversity and beauty of the capital of Bosnia and Herzegovina, with a help of this Guide we would like to help you to learn about the beauty of its environment. We hope that you will spend a part of your free time on beautiful and surprising mountaineering paths around Sarajevo, which are almost at the touch of your hand. We are not immodest if we say that you cannot very often find a city like Sarajevo, which has, in its close vicinity, mountains with peaks even of over 2000 meters high, from which you can observe landscapes so diverse that wherever you look you will see something new and different. You will make sure that the mountains around Sarajevo have its beauty and you will become enthusiastic equally as about alpine peaks.

Today, when modern man is exposed to the rhythm of everyday hard work, the only true and quick relaxation can be found in an active vacation on the mountains. Just the mountains Crepoljsko, Bukovik, Trebević, Bjelašnica, Igman, Visočica, Bitovnja, Jahorina, Ravna planina, Romanija and Treskavica with marked and non-marked paths, mt. homes, houses and shelters, mountain villages with their hospitable inhabitants, beautiful flower pastures, wild forests and challenging mountain peaks will give you an unexpected experience.

Although the mentioned mountains do not reach the heights of alpine peaks, do not start without paying attention to your gear, fitness and health. This Guide will help you to move safely and to find the wanted destination. We believe that you know that the moving through the mountain is not a simple walk. It should not be hard for you to find in the contents of this book our well-meaning advices so that you may, with joy, realise your short excursion or longer tour and return home satisfied.

By publishing of this Guide we want to express gratitude and admiration to all known and unknown travellers, scientists, highlanders and especially mountaineers who walked through these beautiful mountain areas and long before us paved paths, through which we walk today and through which will walk our and your grandchildren and their children and further discover the beauty of these mountains.

We thank to Gordan Čahtarević, Velija Hasanbegović, Joža Engel, Emir Joidaš, dr. Advija Mušalić-Stajić, Nermin Mulavdić, Damir Smajić, prof.dr. Dubravka Šoljan and prof. Mirsad Zorabdić who enriched the contents of the Guide with their suggestions.
